
Optimising your journal within OJS

Optimisation de votre journal dans OJS

Search Indexing

Help search engines like Google discover and display your site. You are encouraged to submit your [sitemap](#).

Description

A sports medicine journal publishing {

Provide a brief description (50-300 characters) of the journal which search engines can display when listing the journal in search results.

Custom Tags

```
<meta name="description" content="This academic peer-reviewed journal is an open access journal and publishes contributions on sports medicine, biokinetics, physiotherapy, exercise and sports science, dietetics and psychology.">  
  
<META NAME="ROBOTS" CONTENT="INDEX, FOLLOW">  
  
<meta http-equiv="Content-Type" content="text/html; charset=UTF-8">
```

Add custom HTML tags, also known as meta tags, that you would like to be inserted in the head of every page. Consult a technical advisor before adding tags here.

Improve your performance on Google Search

Search Console tools and reports help you measure your site's Search traffic and performance, fix issues, and make your site shine in Google Search results

Help

[PubMed XML Export Plugin](#): Export article metadata in PubMed XML format for indexing in MEDLINE.

[Portico Export Plugin](#): This plugin may be used to export your journal content for inclusion in the Portico digital preservation service. Content may be downloaded manually to your local computer for later delivery to Portico, or may be sent directly to your account on the Portico FTP server.

[QuickSubmit Plugin](#): One-step submission plugin

[DataCite Export/Registration Plugin](#): Export or register issue, article, galley and supplementary file metadata in DataCite format.

[Native XML Plugin](#): Import and export articles and issues in OJS's native XML format.

[Users XML Plugin](#): Import and export users

[CrossRef XML Export Plugin](#): Export article metadata in CrossRef XML format.

[DOAJ Export Plugin](#): Export Journal for DOAJ.

[Contact DOAJ for inclusion](#)

If you would like to register articles from within OJS, please enter your DOAJ API Key. Else, you'll still be able to export into the DOAJ XML format but you cannot register your articles with DOAJ from within OJS.

DOAJ API Key

You will find your API key on your DOAJ user page.

OJS will deposit articles automatically to DOAJ. Please note that this may take a short amount of time after publication to process (e.g. depending on your cronjob configuration). You can check for all unregistered articles.

Use the DOAJ test API (testing environment) for the registration. Please do not forget to remove this option for the production.

DOAJ API key guidelines:
